International Mobility and Cooperation digital
Program Goals

Goal 1: Embedding digitally supported, transnationally entangled curricula and study programs

Teaching and learning formats:
- online, blended learning, mobile learning
  - Synchronous + asynchronous collaborations, participation of enrolled students in programs offered by partner universities
  - Competence orientation, recognition and examinations
  - E.g. virtual classrooms, project-based teaching, webinars, social media and VR ...

Anchoring:
- joint modules, joint programs ...
- blended learning and short-term mobility

International Student Mobility: 3 Steps of Recognition

1. Submission
Submission of study achievements by students for recognition by the target university

2. Validation (digitally supported)
Examination, validation and digitally supported processes of recognition of study achievements by the university

3. Provision of information
Provision and maintenance of information relevant to the recognition of academic achievements

User group: Students
User group: Universities
Some Prototypes to be Developed by Universities
